

TRAN THANH VINH

Front-End Developer

District 12, Ho Chi Minh City | 0355367829 | vinh7085@gmail.com

GitHub: <https://github.com/Vinhpc123>

Front-End Developer with practical experience building responsive and user-friendly web applications using ReactJS, JavaScript, HTML, CSS, and TailwindCSS. Experienced in developing e-commerce features, admin dashboards, RESTful API integrations, authentication flows, and real-time chat. Seeking an entry-level Front-End Developer role to apply my front-end skills in real-world projects, continue learning software development practices, and gradually broaden my technical foundation with the long-term goal of becoming a well-rounded Software Engineer.

EDUCATION

2022 - 2026

University of Transport and Communications Ho Chi Minh City (UTH)

Web Development | Major: Information Technology

- Current GPA: 3.30/4.0

SKILLS

- Microsoft SQL Server
- MySQL, PostgreSQL

Tools & Others

- Git & GitHub workflow
- Postman
- RESTful APIs
- JWT Authentication

LANGUAGES

English

Basic reading

Able to read technical documents with translation support

EXPERIENCE / PROJECTS

May 2026 - May 2026

Modern Portfolio Website | *Role: Front-end Developer*

A high-performance personal portfolio website designed to showcase professional skills and projects with a focus on modern UI/UX

- Implemented a sleek Dark/Light Mode system with persistent theme settings.
- Created smooth scrolling and interactive animations using Framer Motion for a premium feel.
- Engineered a fully responsive layout optimized for all screen sizes (Mobile, Tablet, and Desktop).
- Leveraged TypeScript to ensure type safety and improve overall code maintainability.

Technologies: React, Vite, Tailwind CSS, Framer Motion, TypeScript.

Nov 2025 - Jan 2026

Jewelry E-commerce & Management System | *Role: Fullstack Developer*

Developed a full-stack jewelry e-commerce system with separate customer and admin/staff portals, supporting online shopping, in-store POS operations, order management, real-time customer support chat, and online payment integration.

- Built separate customer and admin/staff workflows for a jewelry e-commerce platform.

- Implemented role-based authentication and authorization for customer, staff, and admin accounts.
- Developed product, order, user, and coupon management modules for the admin dashboard.
- Integrated VNPAY for secure online payment processing and order status handling.
- Built a real-time customer support chat system using Socket.IO.
- Developed an in-store POS module for staff to create and process offline/online orders.
- Implemented password reset via email and image upload handling for user/product management.

Technologies: React, Vite, Tailwind CSS, React Router, Axios, Node.js, Express.js, MongoDB, Mongoose, Multer, Nodemailer, VNPAY, JWT Authentication, Socket.IO.

Jul 2025 - Sep 2025

WatchStore | *Role: Front-end Developer*

Developed a watch e-commerce website with customer-facing shopping features and an admin management dashboard. The system supports product browsing, cart and checkout flow, order management, customer contact handling, inventory tracking, and point-of-sale support for admins.

- Built complete e-commerce flow: product listing, cart, checkout, and order tracking.
- Implemented inventory-aware cart and order processing with stock validation.
- Developed admin dashboard features for product, order, user, and sales management.
- Added product search, filtering, pagination, POS support, and responsive UI for customer and admin pages.

Technologies: HTML5, CSS3, JavaScript, Font Awesome, PHP, MySQL, XAMPP, Chart.js.
